TSC

December 12, 2024

Agenda

- **Ansible branch merges**
- **SEAPATH first Release**

Ansible branch merge

Merge all SEAPATH variants (CentOS, Debian and Yocto) Ansible files into a single branch.

2 branches

- **main** for Yocto
- **debiancentos** for Debian and Centos

Only main branch

- Specific prerequisite roles for variants
- Specific variant files
- All other roles are shared

Ansible branch merge

Works done

- Debian and Centos Ansible files are already in the same branch
- Yocto's code has been merged inside debiancentos branch
- Yocto's CI test has been added inside debiancentos

Works to be done

- main branch → yocto-legacy
- debiancentos → main
- Update weekly CI
- It should be finalized next week

SEAPATH first release

Works done

- Add support for the last Yocto's LTS Scarthgap
- Update Yocto's cybersecurity tests
- Ansible examples configurations refactor

Works to be done

- Finalize Ansible branch merge
- CI CentOS
- Improve the wiki documentation
- Git tag repos
- Release end of December

Next TSC: January 9, 2025
